PREFACE

This volume contains a collection of the papers that were presented at the Thirteenth Annual Meeting of the Linguistic Society of The Netherlands (Algemene Vereniging voor Taalwetenschap), held in Amsterdam on January 23, 1982. The Annual Meeting offers an opportunity to the Society's members to report on their work in progress. The present collection represents several directions in linguistics and the contributions have been arranged accordingly. The volume contains sections on History of linguistics, Dialectology, Syntax and Semantics, Morphology and Phonetics.

For a variety of reasons some of the papers that were presented at the meeting have not been included in the volume. Most of them have already appeared or will appear elsewhere. The following papers from the meeting have not been included in this collection:

duktie van preposities door afatici;
Hubert Cuyckens, Componentiële vs. niet-componentiële analyse;

M. Everaert, Syntactic passive in Dutch, *Utrecht working papers in linguistics*
II (1982);
Arn. Evers, Sluicing versus gapping;
